### **Confidentiality and ethics**

**The names of companies in which we have carried out projects will not be mentioned in this newsletter.**

**AUGER GROUPE CONSEIL INC.**  
*Génie industriel / Industrial engineering*

## PVA Certification

The Association des manufacturiers d'équipements de transport et de véhicules spéciaux (AMETVS) and the important contract givers, in cooperation with the Ministère de Développement économique, de l'Innovation et de l'Exportation (MDEIE), have introduced a PVA Certification program for suppliers of the transportation equipment industry. Addressing all elements of the supply chain, this program focuses on the suppliers' ability to meet the global needs of their clients. The PVA-SVTEA Certification, now officially recognized by all the contract givers, has therefore become a selection criterion when awarding contracts.

Mr. Normand Boisvert, a technician at Auger Groupe Conseil, is among the certified PVA experts who can accompany companies through the certification process. The program allows companies to receive a certification rating of gold, silver or bronze according to the level of application of the PVA concepts.

Certified companies benefit from increased visibility with important contract givers, and the certification also attests to their leadership abilities within their industry.

In fact, sectors outside the transportation industry are already showing interest in the program. Please do not hesitate to call us for any information on the PVA Certification, which is fast becoming a standard applicable to the manufacturing sector as a whole.

***Together, we are stronger***

*Auger Groupe Conseil and Dircsys are joining forces to conquer the Atlantic Provinces market. This union at once creates an important and distinctive opportunity to deal with competition that exists in management and human engineering.*
